

Express Glass Lifter – 150 kg.

The Express Glass Lifter is little and handy, and can lift up to 80 kg glass/windows when used by 1 person, and up to 150 kg glass/windows when used by 2 persons.

With the Express it is possible to pass through narrow doors, to rotate glass or to turn it 90 degrees around its own centre.

The wheels are flexible and can be pushed in if it is necessary to go through a narrow door. The Express can rotate glass up to 300 cm.

It is easy to disassembly the Express into two parts and then to transport it even in a little vehicle.
